

HEATING AND COOLING REBATE APPLICATION

2026 Rebate Form

Must be purchased/installed between Jan 1, 2026 and Dec 15, 2026
Submissions for 2026 Rebates must be completed using current forms

Request for rebates must be submitted to LREC by December 15, 2026. Once funds have been depleted, rebates will cease.

Member Information

Name _____ Account # _____

Address _____

City _____ State _____ Zip _____ Phone _____

By signing this application, I certify the appliances for which I am claiming a rebate are qualifying products and are installed at the address listed above which represents a valid cooperative account.

Signature _____ Today's Date _____

Equipment and Installation Information - Air Source Heat Pump

Ductless Air Source Heat Pump Systems ≤ 1 ton

<input type="checkbox"/> High Efficiency (≥ 14.3 SEER2 & ≥ 7.5 HSPF2)	\$ 150.00
<input type="checkbox"/> Premium Efficiency (≥ 15.2 SEER2 & ≥ 8.1 HSPF2)	\$ 250.00

Ductless Air Source Heat Pump Systems > 1 ton - 5 tons

<input type="checkbox"/> High Efficiency (≥ 14.3 SEER2 & ≥ 7.5 HSPF2)	\$ 750.00
<input type="checkbox"/> Premium Efficiency Tier (≥ 15.2 SEER2 & ≥ 8.1 HSPF2)	\$ 1,000.00

Ducted/Hybrid Air Source Heat Pump Systems up to 5 tons

<input type="checkbox"/> High Efficiency (≥ 14.3 SEER2 & ≥ 7.5 HSPF2)	\$ 750.00
<input type="checkbox"/> Premium Efficiency Tier (≥ 15.2 SEER2 & ≥ 8.1 HSPF2)	\$ 1,000.00

Manufacturer _____

Condenser model number _____ Condenser serial number _____

Evaporator coil model number _____ Evaporator coil serial number _____

Furnace model number (if new) _____ Furnace serial number _____

Is Air Source Heat Pump Connected to Off-Peak/Load Management Yes _____ No _____

Equipment and Installation Information - Ground Source Heat Pump

Ground Source Heat Pump (GSHP) qualifying criteria – **Closed loop only**; must be ENERGY STAR listed

Manufacturer _____ Model Number _____

Total Tons _____ Type of Installation: New System _____ Replacement Compressor(s) _____

Type of Ground Source Heat Pump: Open _____ Closed _____

Is Ground Source Heat Pump Connected to Off-Peak/Load Management Yes _____ No _____

Contractor Information

NOTE: An invoice showing purchase date, equipment, manufacturer, model numbers and serial numbers along with AHRI certificate must be submitted with application. On new systems, an invoice for loopfield installation is required also.

Contractor Company Name _____

Phone _____ City _____ State _____

Is your HVAC Contractor listed as a Qualified Installer? Yes _____ No _____ (see page 3 for QI Installer information)

IMPORTANT:

- Check with cooperative for qualifying rebate amounts.
- Product(s) must be installed within the cooperative's service territory.
- To verify specific model efficiency ratings or ENERGY STAR certification status please visit the following resources
- Ductless ASHPs – [https://www.energystar.gov/productfinder/product/certified-furnaces/results](https://www.ahridirectory.org/Search/SearchHome?ReturnUrl=%2fhttps://www.energystar.gov/productfinder/product/certified-furnaces/results)
[https://www.ahridirectory.org/Search/SearchHome?ReturnUrl=%2fhttps://www.energystar.gov/productfinder/product/certified-geothermal-heat-pumps/results](https://www.ahridirectory.org/Search/SearchHome?ReturnUrl=%2fhttps://www.ahridirectory.org/Search/SearchHome?ReturnUrl=%2fhttps://www.energystar.gov/productfinder/product/certified-geothermal-heat-pumps/results)

Rebate program is subject to change or cancellation without notice. Call cooperative if there are questions on program status.

Items needed for your submission:

- Rebate Form
- Invoice/Paid Receipt (a copy is ok)
- AHRI Certificate (aka Certificate of Product Rating)

Return by mail to LREC

P.O. Box 643
Pelican Rapids, MN 56572
Or scan and send by email to rebates@lrec.coop

Heating and Cooling

2026 Reference and Conversion Sheet

Notice: On January 1, 2023 the Department of Energy (DoE) began using a new testing procedure to rate the efficiency of air conditioners and air source heat pumps. These changes require new metrics (SEER2/EER2/HSPF2) that were derived from the DoE's new test procedure (M1) rather than the historical metrics (SEER/EER/HSPF) from the old test procedure (M).

The simple conversion table below will help you to identify air conditioning (AC) and air source heat pump (ASHP) equipment that qualifies for ENERGYWISE rebates in 2025 using the following steps.

Step 1: Determine what ratings system was used for the equipment model that you plan to purchase.

Step 2: Confirm that the efficiency ratings of the new equipment exceeds the requirements for the rebate measure you are applying for using the table below to convert between the old and new efficiency ratings when needed.

SEER	DUCTED SEER2	DUCTLESS SEER2
14.0	13.4	14.0
14.5	13.8	14.5
15.0	14.3	15.0
15.5	14.8	15.5
16.0	15.2	16.0
17.0	16.2	17.0
17.5	16.7	17.5
18.0	17.2	18.0
19.0	18.1	19.0
20.0	19.0	20.0

EER	DUCTED EER2	DUCTLESS EER2
10.2	9.8	10.2
11.0	10.5	11.0
11.5	11.0	11.5
11.7	11.2	11.7
12.0	11.5	12.0
12.2	11.5	12.2
12.5	12.0	12.5
13.0	12.5	13.0

HSPF	DUCTED SPLIT HSPF2	DUCTED PACKAGE HSPF2	DUCTLESS HSPF2
8.0	6.8	6.7	7.7
8.2	7.0	6.9	7.9
8.8	7.5	7.4	8.4
9.0	7.7	7.6	8.6
9.5	8.1	8.0	9.1
10.0	8.5	8.4	9.5
11.0	9.4	9.2	10.4

NOTE: The cross references for efficiency in the above tables should be noted as approximate.

Items of Note to Member:

- Rebates \$500 and under will be issued as a credit to the electric bill. Any rebate greater than \$500 will be issued as a check and mailed to address on file for the member. LREC reserves the right to issue rebates as a credit on the electric bill if the member's account is in a "past due status". Allow 6-8 weeks for processing.
- Limit of one ductless, ducted or ground source heat pump per member per year. Rebates are a first-come, first-serve basis while funds are available.
- Product(s) must be installed within the cooperative's service territory.

Residential Quality Installation (QI) Program

QI Certified Contractors:

A QI certified contractor has passed a QI assessment and/or is North American Technician Excellence (NATE) installation certified and have agreed to following industry best practices regarding the proper installation of equipment. This program validates four components of the installation: proper sizing, airflow, refrigerant charge and duct leakage.

Equipment purchased from and installed by non-QI certified contractors is not eligible for the rebate.

A list of QI certified contractors can be found at https://hvacree.net/gre/public_search.cfm. Information on how to be a certified contractor or ordering forms can be found at <https://greatriverenergy.com/smart-energy-use/installations/>.

Rebate Details:

Rebate amounts vary depending on the efficiency rating, the type of equipment and whether there is a special promotion going. Contact your electric cooperative for specific rebate details and availability. This rebate program is subject to change without notice.

Qualifying Members:

Members applying for the rebate must be a member of and receive residential electric service from one of Great River Energy's participating cooperatives.

Members are responsible for meeting all of the program requirements, and for complying with any government or third-party requirements, including applicable codes, ordinances, rules or regulations regarding the installation of the equipment.

Qualifying Equipment:

Equipment must be a new, high efficient central air conditioner or air source heat pump with an efficiency of 15 SEER/14.3 SEER2 or higher. The system must be matched meaning the outdoor condenser unit and the indoor evaporator coil were designed by the manufacturer to work together. No commercial, reconditioned, or ground source heat pumps qualify for the QI rebate program.

Only equipment listed on the Air-Conditioning, Heating & Refrigeration Institute (AHRI) website (www.ahridirectory.org-residential) will qualify. The AHRI list is dynamic and changes frequently, therefore AHRI certificates that are printed within two weeks of the installation date will be honored and must be submitted with the rebate form.

The use of the furnace's variable speed fan to increase the SEER/SEER2 rating above the nominal rating will be allowed for determining rebate eligibility provided the furnace was installed within one year prior to the central air equipment purchase.

Application Details:

Rebate form must be completed, signed by contractor and submitted to the electric cooperative along with the following:

- Equipment invoice, all information on the invoice must precisely match the information on the rebate application or the application will not be processed
- AHRI certificate for installed equipment

An application that is denied due to equipment ineligibility will not be accepted with changed model numbers.

If conditions do not allow for proper testing (see equipment testing section below), the member will be eligible for the rebates as long as testing is completed and application submitted by July 31 of the following year.

It is the member's responsibility to ensure that the electric cooperative receive the rebate application materials. The electric cooperative is not responsible for any lost, late, stolen, ineligible, illegible, misdirected, or "postage due" mail. All completed submissions become the property of the electric cooperative and will not be returned. Warning: Fraudulent submission of the form may result in prosecution for mail fraud pursuant to Title 18 US Code sections 1341 and 1342.

Testing the Equipment:

The contractor must activate the system and perform the appropriate tests for airflow and refrigerant charge. These tests can only be conducted when the outdoor (ambient) temperature meets the manufacturer's specifications. Rebate applications may not be submitted until testing is complete.

Liability:

By participating in this program, the member agrees that the electric cooperative has no liability concerning the quality, safety and/or installation of the equipment, estimated energy savings, workmanship of any third parties, or use of any equipment. The electric cooperative shall not be liable for the work performed by the members engineer, contractor or vendor. Participation by a contractor in this program does not constitute an endorsement by the electric cooperative of the contractor, or a guarantee of the quality of the work.

The electric cooperative is not responsible if the heating and cooling contractor, retailer, builder or any other party provides the member with inaccurate information about the amount or qualifications of the actual rebate. The electric cooperative will not rebate equipment that has been mislabeled or misrepresented.
